Nutrient 950®

With Metafolin® L-5-MTHF

Introduced 1992

What Is It?

Nutrient 950® is a complete hypo-allergenic, nutrient rich, highly bioavailable multi-vitamin, multi-mineral and trace element supplement. It contains superior mineral cofactors and activated vitamins, and provides an excellent antioxidant profile. It is also available in the following formulas: without iron; without copper and iron; without copper, iron and iodine; with Vitamin K; and with N-acetyl-l-cysteine (NAC). Nutrient 950® was formulated exclusively for nutritionally oriented doctors who demand the highest quality multi-vitamin and mineral formula available for their patients.*

Uses For Nutrient 950®

Optimal Health: Nutrient 950® provides a high profile of free radical scavenging antioxidants important for cardiovascular, immune, and cellular health. The vitamins and minerals in this formula also support various physiological functions, including nervous system health, bone health, nutrient and hormone metabolism, and glucose utilization. Nutrient 950® provides fully chelated minerals for optimal absorption and activated vitamins, including Metafolin®, the naturally occurring universally metabolized form of folate. Metafolin® is chemically identical to the active folate metabolite, 5-methyltetrahydrofolate (L-5-MTHF), the predominant, naturally occurring form of folate in food. Through bypassing several enzymatic activation steps, it is directly usable by the body and provides all of the benefits of folic acid regardless of functional or genetic variations. This is a gentle, hypoallergenic formula, which is well tolerated by sensitive individuals.*
